Spring 1911

To tell you what plants you need

cannot be satisfactorily accomplished in an abridged book the size of an ordinary catalogue.

Individual circumstances and conditions have a bearing on each problem, and each is distinctly different from the others.

You can, however, get direct, personal and immediate help of the right kind, suited to the problems you have in hand, by writing us in detail.

One man from among our six District Managers has entire charge of all work and correspondence in your state, under the constant daily advice of our S. Mendelson Meehan. Your query will go direct to your District Manager and be answered by him.

He is not a clerk, but a competent and well informed horticulturist who is familiar with horticultural conditions in your locality.

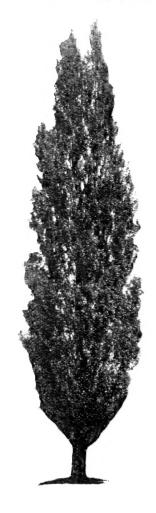

His knowledge is supplemented by the general fund of information accumulated in our 57 years of horticultural experience.

Write to us,—to him—and ask all the questions which trouble you about your garden plans. There is no charge for any service we can give by letter. We welcome an opportunity of assisting, whether your plans are small or extensive. It is one of the Meehan methods of co-operation.

Just write to

Thomas Meehan & Sons Germantown, Philadelphia, Pa.

This is a Most Unusual Book

It has not been many years since the purchaser of trees hardy plants was forced to accept almost any size of plant from the dealer and grower. The nurseryman at that time never dreamed of listing sizes in his catalogue, in fact he found it very convenient not to do so.

We changed those condi-The first catalogue to list sizes and price them individually was Meehans'. That this was a sens ble and sane business thing to do was evidenced by the fact that almost all nurserymen followed our example at once, and to-day it is hardly possible to pick up a plant catalogue in which sizes are not used altogether.

Far more important than the listing of sizes, however, is the need for an honest description of the plants that are for sale. It is only natural that we should feel that way, in view of the fact that we know our plants are supe-

rior in quality and wish to carry that message to our customers and friends.

This season we believe we have accomplished that in the issuing of this book. That is why we consider it an unusual book.

In June we had a complete inventory taken of all our plants in our nurseries and this data was collected by our expert salesmen. When finally assembled, S. Mendelson Meehan, with the Stock and Advertising Managers, made a second complete tour of our entire estate and very carefully priced and described each lot.

Don't you consider that we are entitled to call this book unusual? Don't you think it is one in which you can have

every confidence when you order?

Not only will you find it helpful in this respect but the prices which have been named are extremely reasonable when quality is kept in mind. We are proud of our grounds, and we want to have our customers feel free to call and see for themselves that what we say is so

and see for themselves that what we say is so.

This book does not attempt to carry descriptions of the individual plants. It is too much to get into one book. We have our Garden Bulletin for carrying this message. Have you seen a copy? If not write for one. We will gladly mail it free for your examination.

THOMAS MEEHAN & SONS Germantown, Philadelphia, Pa.

Deciduous Trees

When you buy trees be careful. A second quality tree is worse than none at all. It is a permanent eyesore and a worthless purchase.

"Meehan-grown" trees represent the best that money

can buy.

Why?

Because the stock is not only started right, but reared right, sold right and shipped right.

The soil is regularly and heavily fertilized with the best plant. with the best plant food ever produced—

barn-yard manure.

Trees are set wide apart that they may have room for individ-ual development, root and branch, get abun-dant circulation of air, and be open to strength-giving light. Those giving light. Those most inclined to grow crooked, "drawn up" by strained light, are straighter than usual. Frankly, a mold would not keep some straight.

Stems are staked to induce straightness; tops are pruned to encourage symmetry and at times to prevent crowding.

The The selection plants for an order is a The selection salesmen do this per-sonally—not the dig-Your wants gers. made known through correspondence or con-

versation are not easily transferred to another by mere routine; and where there seems to be the smallest opportunity to give better service your tree is personally selected and tagged. This important phase of our business comes under the personal supervision of Joseph Meehan, who has been with the business since its early days.

Then the digging is in charge of small groups of men—two or three each—no large gangs of laborers rushed through by brute superintendence, but each little group with at least one man, the least of whom has been at it under

our training for say ten years.

Finally, the packing is personally superintended by Edward Meehan, whose experience of half a century is a fair guarantee that if a tree has failed in the handling up to this point it won't go out at all. Our watch-dog, so to speak, is at the outer door at the critical mcment, and not barking at one rat-hole while trouble unobserved flees from a dozen others.

Comparison with all other packing houses will show ours to be uniformly of the highest character.

The statement of diameter of trunk means more to the purchaser than height in trees that have passed a certain stage. We avoid cataloging height wherever possible. Under competition of prices carry this fact, and learn that as diameter is one of the leading factors in determining valuations, our stock is invariably reasonably priced.

This pricing, by the way, is done right in the nursery with the stock before us. The manager, S. Mendelson Meehan, heading an important committee of three, carefully criticizes every figure. There are no inflations and meritless fluctuations—no bears or bulls, but real value.

"Dia." means diameter of trunk of tree at the base. Size following name, in parenthesis, represents approximate height at maturity.

Coniferous Evergreens

We believe in frequently transplanting our ever-greens, which results in a splendid root development. In we digging them we also care for these fine roots by taking up soil and roots and burlapping them together.

As evergreens are usually desired for special purposes, let us aid you in your selection. Tell us

what you want them for, the general lo-cation, or if a bed, its size and position.

Size following name, in parenthesis, represents approximate height at maturity.

A snap of some plants in block 19. All are full, well-developed and unusually fine for American Arbor Vitæs.

ARBOR VITAES

We have some grand plants of Arbor Vitæs, just suited for hedging and screen work. See Hedge Department for special rates.

Thuya occidentalis. American Arbor Vitæ (20 to 25 ft.). Fine specimens. The best we ever saw. Not slender and shanky, but full and rich.

	sicinate and situatiky, but full and fitti.

Evergreen Shrubs

Indiggingcurevergreen shrubs, wherever neces-sarythesame method as wherever necesfor other evergreens adopted in the balling and burlapping of the Of course this is roots. out of the question with native Rhododendrons and plants with similar root systems.
All these shrubs are

in fine condition An Azalea moving and are of the amoena just as moving and are of the it is dug. same high quality that Note the large characterizes all ball of roots. "Meehan-grown" plants.

Size following name, in parenthesis, represents approximate height at maturity.

RHODODENDRONS AND COMPANION PLANTS

ENGLISH-GROWN RHODODENDRONS

To-day we have the very choicest hybrid Rhododendrons that money can buy, and they come from England, from a grower who is known as an expert in Rhododendron culture.

These plants have good roots, are well budded and ashy. You can get results from them at once. bushy.

Album elegans. White, tinged pink in the bud. vigorous grower.

Album grandiflorum Very fine white, tinted blue.

Atrosanguineum. Rich blood-red.

Blandyanum. Rosy crimson flowers, rich foliage. B. W. Elliott. Deep rose, with dark spots. Caractacus. Truss large, rich crimson. Late.

Chas. Bagley. Cherry red flowers.

Chas. Dickens. Rich scarlet-crimson, fine foliage. Delicatissimum. Blush white, tinted pink.

Everestianum. Rosy-lilac flowers and foliage superior to all.

Gloriosum.

Gloriosum. White with a tint of violet. **John Walter.** Rich crimson of a beautiful form.

Lady Clermont. A rosy-scarlet with deep dots. Distinct.

Lady Gray Egerton. Silvery-white tinted blush.

Michael Waterer. Scarlet, intensely bright.

Mrs. J. Clutton. A good white, prettily spotted yellow.

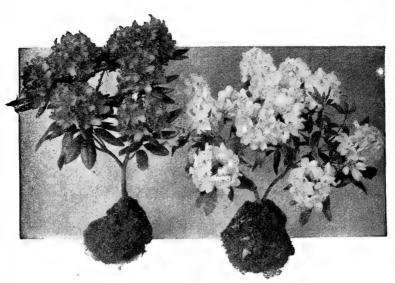

Mrs. Milner. Rich crimson, fine foliage.

Purpureum elegans. A grand, rich purple. Good foliage.

Roseum elegans. An attractive light rose.

This shows the kind of hybrid Rhododendrons we get from England.

BOX

Promiscuous importations of Box have brought into the States quite a confusion of varieties and names, till the best authorities are prone to throw up their hands in despair at an attempted identification.

It has been our aim to adopt a practical course, recognizing the *purposes* for which the plants are wanted, and classifying the varieties accordingly.

Arborescens represents the somewhat free-growing forms with small, neat, pointed leaves. It is easily kept in any desired shape through shearing, or will grow nicely undisturbed. Our stock is considered unusually handsome.

Pyramids are really "conical," being closely clipped. These and the standards are

invaluable for any tormal position, and often more satisfactory than bay trees.

The other varieties are very distinct and their names clearly identify each.

Tubs, Pails and Pots.—For decorative purposes in rooms,

on porches, steps or posts we always have some of these plants in convenient form for handling at almost any time. It is also a method of accommodation where some one has been unable or neglected to attend to ground planting at the proper season. These the proper season. These plants may be shipped in tubs, knocked out and planted without disturbing the roots, an impractical thing out of season without the provision

of tubbing.

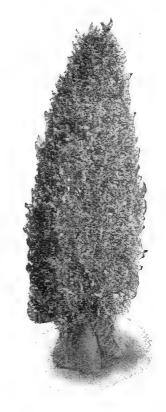

These pots are plain unless specially ordered; the pails light, inexpensive, but neat in green paint, and the cedar

tubs heavy and durable.

Special sizes ordered from the open ground to be placed in tubs or pots will be in-creased in price to the value

of the tub and labor entailed.

Christmas Opportunities.— The Box makes one of the most satisfactory and effective plants for use in Christmas decorations, and our list of prepared plants should always be consulted. They make very substantial presents.

While, as with all outdoor plants, inside life is unwhole some to the Box, it lends itself readily to winter uses and storage, and a little study and care may bring them through in this state.

Water.—Bear in mind that the Box has very fibrous roots, and is, therefore, a "hard drinker." Water copiously when the plant is in tubs, at the same time beware of overdosing, especially when the plant is kept cool and not growing.

Dwarf Evergreen Collections

There is quite a demand of late for nice, well-formed evergreens for grouping in beds and borders.

In such collections, care must be exercised to include

only those of dwarf growth or varieties which will_bear trimming from time to time.

We have such a fine stock of plants suitable for just these purposes that we make the following group offers:

In these collections are contained a number of kinds that will give a variety of form, followed and color.

Group 66

10 Evergreens—assorted—9 in. to 2 ft. high—our selection—sufficient to plant 25 square feet—a pleasing collection...

Group 67
25 Evergreens—assorted—9 in. to 3 ft.—our selection—sufficient to plant 75 square feet—fine for any bed of this size—for.....\$27.50

We believe in ample room for development for our shrubs. That accounts for their great bushiness.

Deciduous Shrubs

We cannot make cold type tell you all we should like to about these distinctly "Meehan" products.

They are different from ordinary shrubs—have had a different life—more room, more care, more cultivation.

They are past the nursing stage.

What they are is summed up in a note from W. F. H. in Dayton, Ohio. Here is what he says: "I wish to speak spring. First, I will say you sent me the finest lot of shrubs I ever bought. Each one was good enough for an individual especimen. They have all grown better than I expected.

We could go on and quote innumerable letters like this

one, and, mind you, they are unsolicited, but we prefer to convince you by proving our statements with trial orders.

In cataloging our shrubs this autumn you will find an honest description of their quality that should be of assist-

ance to you.

They are priced reasonably, especially so in view of their superiority. Note liberal reductions in quantities.

superiority. Note liberal reductions in quantities. Size following name, in parenthesis, represents approx. imate height at maturity.

One Dozen Big Shrubs—\$5.00

A group of fine specimen shrubs-not one second-class or inferior.

Very few people know how far superior to ordinary shrubs are the Meehan-grown ones, which we are contin-ually sending out. They are as near perfect as can be grown.

Here is a dozen big, full, well-developed plants that are worth double their present price.

Order at once—do not delay.

	Mock Orange

R. var. rosea, Standard Form. Beautiful and quite rare. Specimens, 5 to 9 ft., \$3.70 to \$7.50 each.

One of our specimen Viburnum tomentosum. Do you wonder at our pride in the quality of our plants?

25 Big Bushy Shrubs-\$10.00

You may get quick, immediate results by using this group of sturdy, well-developed specimen shrubs.

Not one is second class, but in each case they are so full and developed as to show the unusual care that has been given them.

For screening, shrub-border planting or as individual specimens they are sure to please.

Carefully note the good size of all of them, the high quality of the selection and decide to have us send you the group.

Better decide early, as the quantity is not unlimited.

If you were to buy these separately elsewhere, you would pay at least \$13.00 to \$15.00 for the lot and not get as good quality.

Unique Flowering Trees

You know the Magnolias, the Horse Chestnuts, and other flowering trees quite commonly planted, but here are three trees which we doubt if you ever saw in flower.

The Styrax Japonica has a pure white flower like a Fuchsia in great profusion all over the tree.

The Varnish tree, Kælreuteria, has immense panicles of orange-yellow flowers in July. It is a treasure.

In August the yellowish-white clusters of flowers on the Chinese Pagoda tree (Sophora Japonica) are showy and very ornamental. It has also beautiful dark green foliage.

Why not individualize your lawn by setting out on it these three particularly choice and uncommon trees? You could not find a better time than the present.

You could not find a better time than the present.

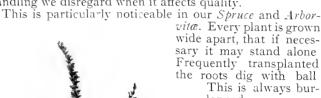

Germantown, Phila.

Hedges, Windbreaks, Green Walls, and Dwarf Edgings

handling we disregard when it affects quality.

This is particularly noticeable in

lapped.
All our hedge plants are given unusual care which makes Meehan-

quality distinctive.

See Meehans' Garden Bulletin for September, 1910, for any information required to effect a satisfactory selection for special purposes.

Vines and C

(For running roses, see pages 64 and 65).

Here is an excellent collection of native and foreign vines suitable for all purposes.

There will be found many listed as pot-grown, and we wish particularly to speak of them. Originally we grew them in this condition for late spring and summer planting. Now we sell probably more of them than of field-grown plants in regular planting seasons. Our customers find these "balled" plants worth twice as much as disturbed roots from the field.

They are strong, well-developed plants which have been

They are strong, well-developed plants which have been brought on in pots. Transplanting does not check their

growth and immediate results are sure to follow.

The Platycodon, or Chinese Bellflower, has a very long flowering season, lasting from June to October, and its blossoms are useful for cutting.

Hardy Herbaceous Perennials

The successful growing and shipping of old-fashioned garden perennials comes only after an extended experience with all manner of kinds.

We are pioneers in growing them since the establishment of our business over fifty years ago.

Instead of getting "rusty" and "set in our ways," however, in the past twenty years we have made a close study of this class of plants in the light of present-day needs.

The result is we have (1) the largest assortment of desirable plants in this country; (2) the broadest knowledge concerning them; (3) the best methods for handling them; (4) strong field-grown roots (except where others are preferable) rather than the convenient but puny potted yearlings: (5) and finally, a huge arm of our business and not a tail like that of Halley's famous comet—more imaginary than visible.

Shipping limits there are none when we are given time to make a seasonable shipment. Even under unfavorable conditions we are able to surmount most difficulties through the most skillful experienced packing.

While no new garden may be expected to be at its best the first season, our strong plants will give reasonably good and 'better than usual' results at once. This means much to every beginner; delays are disappointing, to say the least.

The interests of our customers are kept prominently before us. We know that satisfaction builds business, and it pleases us in the doing as well as in the achieving of such results.

Continually on the lookout for means to meet definite?

needs, we make provisions akin to our original idea by which late planters are enabled to plant lilies in spring, and

many others as well.

Several years ago we spent a couple of thousand dollars in the purchase of the complete collection of Terry's pæonies. Terry was a famed specialist and originator of pæonies, and our collection was consequently placed notably in the lead of all others.

In like manner have we put time and money into the thorough renovation of Hardy Chrysanthemum and other collections. These, however, were but incidents in comparison with our important work in the "creation" of Meehans' Mallow Marvels. The horticultural world has been given a new inspiration in these most beautiful

flowers—and there are more surprises to follow.

Thousands of perennials in full bloom in our gardens point to unusual vigor. These are the plants that fill orders. They are beyond the nursing stage.

Are you a Garden Bulletin reader? You need it 50 cents fer a year's subscription.

Achillea-Yarrow

FAMOUS HARDY CHRYSANTHEMUMS

Our method of growing these for sale may seem contrary

to our expressed rule to send out large plants.

Customers frequently urge us to send them "clumps," but we steadily discourage this and aim not to carry them. Fresh young plants, grown as we do with special care to repot them just at the right time, are superior to "clumps.

According to the supply, we have them in condition to set out from May 1st up to the time of blooming, carrying them carefully in larger pots at the last, at prices revised to agree with current value.

The collection itself is the cream of varieties purchased and collected from every available source—private gardens

We have won many prizes at the big Chrysanthemum Shows. At present we have 38 distinct named kinds, among which are the well-known ones, such as Julia Lagravere, Autumn Queen, Brown Bessie, Goldfinch, Souer Melanie, Globe d'Or, Baby and others as good.

THE "BIG FIVE" HARDY CHRYSANTHEMUMS

Our Hardy Chrysanthemums have been receiving awards Flower Shows for years. They are looked upon as the at Flower Shows for years. cream of the known kinds.

When there is a desire for just a few select kinds, the following five superb, distinct varieties will appeal. They

are as follows:

Julia Lagravere. Large rich maroon.

Souer Melaine. Large pure snowy white.

Prince Victor. Large rich brown.

Golden Mlle. Martha. Medium golden yellow.

A. Neilson. New large pink with silvery reverse petals. Flowers loose and informal in arrangement.

Five plants of each of the above varieties, 25 in all, for

Germantown, Phila.

tGERMAN IRIS

Twenty-six distinct named varieties make up our collection of the German kinds. They are wonderfully fine in form and color; and what particularly interests you as a buyer, they are good strong roots, freshly dug.

Principal among them are the well-known kinds, such as Silver King, Mad. Chereau, Josephine, Purpurea, Canary Bird, Bacchus and others of more or less rarity.

†‡JAPANESE IRIS

Special Lily Offer

Our potted lilies have been giving a great deal of satis-

faction to a wide range of our customers for some years.

By potting them in the Autumn they are well rooted by Spring, planted out without disturbance of the young roots, and immediate results are to be had.

You need some of these glorious Summer-flowering bulbs. Set them in among other plants, as but little room is required. They are hardy, too, giving results for years to

If you want an extra fine selection, let us send you this Special Offer.

25 potted plants, in 6 good kinds, for \$4.50

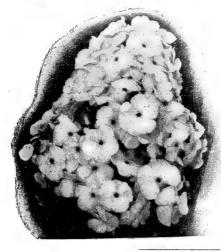

Prices.—Except where specially priced—good strong plants, 15 cents each (postpaid, 20 cents); 10 of one kind \$1.20; 100 of one kind, \$10.00. 5 at 10 rate—50 at 100 rate. * Rockeries † Swamps ‡ Cutting Purposes § Shady Places

Bed of Garden Phlox

You can't have too many summer flowering Phlox.
They are as useful for cutting as for show purposes.

Our collection is not second class in any respect. The best varieties are in it and the plants are big and healthy—no puny, sick specimens.

Send for our big collection of

[‡]Meehans' and Terry's Named Paeonies

When it comes to Pæonies, we don't acknowledge any stock superior to ours, but know that few are as good. At this writing we have one hundred and sixty-one beau-

tiful, distinct named kinds.

These have been picked from double that number. We have trial grounds on which we grow them to find out if

they are suitable for cataloging.

Represented in this collection are those well-known kinds such as Festiva Maxima, Golden Harvest, L'Esperance, Grandiflora rubra, Edulis Superba, Mad. Chaumy, Dorchester, Delicatissima, Plenissima rosea and many others equally as good. There are many varieties which are not to be had elsewhere, coming to us direct from the famous Terry collection.

Each \$.25, \$.50, \$.75 and \$1.00. Some extra size clumps.

Herbaceous Spiraeas

Decidedly good results are to be had from the herbaceous perennial Spiræas.

Some persons are more familiar with them as flowering

plants at Easter.

Among our many varieties are six of particularly pleasing

appearance and we are grouping these in an offer.

These six varieties are not confined to white, but include pink and red-flowered varieties, some of recent introduction.

18 plants, 3 each of the \$2.00

(This collection is suitable for shipping up until April Order early.) 15th.

Meehans' Superb Dahlias

You may find more extensive lists of Dahlias, but in this select collecton are the very choicest kinds obtainable in a good variety of colors.

These roots are *field grown*, and far superior to the small potted plants and rooted cuttings so frequently sent out.

You need Dahlias for plenty of bloom in your garden, and they give wonderful returns in blossoms for cutting purposes.

GOLD MEDAL DAHLIA GROUP

Here is a splendid collection of 23 of the very choicest of the listed varieties, selected with a view to giving a group for general purposes. In this collection are:

5 Cactus 3 Giant

5 Decorative

5 Show

5 New Dahlias

NEW AND SELECT KINDS

Delice. Soft, glowing rosy-pink. Fine form, vigorous, and valuable for cutting.Jack Rose. Brilliant crimson-red, rich, and glowing.

Wonderfully fine.

Flora. Beautiful pure white, Cactus Dahlia.

Burbank. New rich, dazzling red Cactus variety.

Miss Minnie McCullough. Soft yellow, overlaid with bronze. Exquisite.

35 cents each; 10 for \$3.00; 50 for \$12.50.

CACTUS DAHLIAS

These beautiful varieties, with their artistic, narrowpointed florets, are the choicest of all Dahlias.

Galliard. Scarlet crimson. Flowers large and perfect. Profuse bloomer.

Gen. Buller. Rich, velvety maroon, tipped white. fuse bloomer.

Harbor Light. Immense flowers, orders, with flame. One of the very choicest.

J. B. Briant. Golden yellow, tinted cream at tips. Immense flowers, orange red, overlaid

Kriemhilde. Delicate pink suffused rose. popular kind.
Spotless Queen.

s Queen. Pure white variety, very prolific. 20 cents each; 10 for \$1.50; 50 for \$6.00.

DECORATIVE DAHLIAS

A grand class, resembling the Cactus and Show kinds in certain respects. All are well-formed with broad petals. **Blue Oban.** The nearest approach to a rich blue Dahlia.

Frank L. Bassett. Royal purple, shading to blue. Early and profuse bloomer.

Henry Patrick. Superb pure white of large size.

Lyndhurst. Beautiful bright scarlet.

Lyndhurst. Beautiful bright scarlet.

Mrs. Chas. Turner. Pure yellow of immense size. fuse bloomer.

Sylvia. Flowers 4 to 6 inches in diameter. center, shading to soft pink on outside. Grand. 20 cents each; 10 for \$1.50; 50 for \$6.00.

SHOW DAHLIAS

Full, globular flowers invariably quilled. A. Pefferhorn. Rosy crimson, excellent. Camellæflora. Fine snow white variety.

David Johnson. Unique and distinct. Large salmon rose

Miss Dodd. odd. Very large pure yellow. 20 cents each; 10 for \$1.50; 50 for \$6.00.

NEW GIANT DAHLIAS

Peers among Dahlias for size, and should always be in every collection. Pendent. Large bright crimson-maroon. Early and pro-

fuse bloomer.

Mrs. Roosevelt. Delicate soft pink. Flowers 6 to 8

inches in diameter.

Yellow Duke. Immense canary-yellow flowers.

25 cents each; 10 for \$2.00; 50 for \$9.00.

Meehans' Famous Hardy Gardens

From the introduction of our hardy garden collections down to the present they have been a decided success.

Customers for them, after finding how excellent they are, have frequently repeated their orders. This, with the achave frequently repeated their orders. This, with the actual need felt for such assortments by new garden owners, decides our relisting them this season.

The two groups named below are the equal of any offered in the past, and in some respects better, as they include the

more recent introductions.

Big \$10.00 Garden

129 old-fashioned perennials and roots of unquestionable value and quality, suitable for planting a space 180 square feet. This collection is well worth \$13.00 to \$14.00. feet.

The selection is as follows:

Mallow Marvel, 2 year (give ample room).
 Double Pæonies (mixed colors).
 Groff's Hybrid Gladioli (mixed).
 Sweet Williams.
 Silver King Iris.

4 Josephine Iris. 5 Hardy Phlox. 5 English Larkspur.

- 3 Dahlias (assorted).
 4 Purple Cone Flowers.
 4 Hardy Asters.
 5 Dwarf Variegated Grass.

Sisyrinchium—Blue-eyed Grass. 10

5 Hardy Chrysanthemums. 3 Bronze Day Lily.

3 Evening Primroses.

Pink Starwort.

Bellflowers (assorted). 4

Yellow Coreopsis. Scarlet Bergamot. 3

- Blue Baptisia. Scotch Pinks. 3 4

4

New Red Helenium.
Blue Day Lily.
Stoke's Asters.
White Perennial Spiræa. 4

Blue Speedwell. 4

3 Thermopsis Caroliana.4 Hardy Corn Flowers.

\$5.00 Hardy Garden

Comprising 56 old-fashioned perennials and roots, well selected, to give bloom throughout the season. collection for the small border. A splendid

2 Old-fashioned Hardy Chrysanthemums.
2 Double Pæonies (mixed colors).
2 Hardy Yellow Coreopsis.
3 Blue Speedwell.
3 Sweet William (mixed colors).
3 Silved Ring Iris or Flag.

4 Hardy Phlox.

- 2 Dahlias (assorted colors).
 10 Gladioli (mixed colors).
 2 Hardy Aster Tataricus.
 3 Purple Cone Flowers.
 10 Dwarf Variegated Grass.
 3 Single Mixed Hollyhocks.
 - New Red Helenium. Improved English Larkspur.

2 Bellflowers.

Meehans' Pure Grass Seeds

When you buy grass seed you no doubt ask for a quart or bushel, and never realize that it may be good, bad, or indifferent.

A bushel of grass seed may weigh 14 lbs. or 20 lbs., but a bushel of Peerless Grass Seed weighs 20 lbs. always. It is heavy because it is cleaned and recleaned. It does not contain the chaff you buy in the 14-lb. bushel. Remember this fact when you come to get your grass seed this spring. It is only one of the many reasons why Peerless Grass Seed is becoming more popular.

PEERLESS GRASS SEED

1 qt	\$.25	1 bu.	(20)	lbs.)	\$5.50

Gladioli of Known Merit

These beautiful summer-flowering plants should be in

every yard, large or small.
So inexpensive and yet so beautiful, they are practical to

use everywhere.

You need not question the following. They are the cream of the best strains and cover all the shades from white to deep crimson and blue.

Silver Trophy Strains

GROUP No. 1—SCARLET SHADES

Newest reds, scarlets, and crimson. Wonderfully bright and showy.

\$3.00 per 100.

GROUP No. 2-LIGHT SHADES

All shades of cream and yellow, including white. beautiful combinations relieved by dashes of rich color. \$4.00 per 100.

GROUP No. 3 -BLUE SHADES

Wonderfully beautiful shades of lilac, heliotrope, blue, Not obtainable in the cheap kinds. and allied colors. \$5.00 per 100.

Groff's Original Hybrids

The amateur can secure great satisfaction from these hybrids. They are the original introductions of Mr. Groff, and certain shades from pure white to the darkest red and crimson. Flowers are large, well formed, and properly arranged upon the spikes.

Here is a garden paper which helps

The "Garden Bulletin" gives facts about gardening in such a plain, understandable way you get from it needed assistance and delightful reading.

The men who write for it are practical men,—men who know gardening,—not mere journalists.

One man just wrote us,—"I feel that each number I have received is worth more to me than the price of a year's subscription."

Another says,—"Each number is better than the last one."

We want to have you as a regular subscriber, and at 50c. a year the price is insignificant.

Special Combination Offer

The immense popularity of Meehans' Mallow Marvels will result in orders for thousands this Spring.

You can't do without them. Here is a special offer you will want to grasp.

The big, two-year-old roots of Mallow Marvels are sold at 75c. each.

We will sell:

Mallow Marvel, 2 year root year Subscription to "Garden Bulletin,"

Mallow Marvel, 2 year root for \$1.00

Act today and get the early Spring numbers of the "'Garden Bulletin."

Thomas Meehan & Sons, Germantown, Philadelphia, Pa.
